**Remarks**

In view of the above amendments, the applicants submit that all of the claims now pending are in allowable form.

**OBJECTIONS****A. Specification**

The specification is objected to because of informalities. In particular, the Examiner indicates that at page 8, line 4 the phrase "The p-polarized component 27" should be replaced by the phrase "The p-polarized component 45". Applicants have amended the specification to replace the phrase "The p-polarized component 27" with the phrase "The p-polarized component 45". In view of this amendment to the specification, the basis for the Examiners' objection thereto has been removed. Therefore, it is respectfully requested that this objection be withdrawn.

**B. Claims**

The Examiner objects to claim 8 because of informalities. Specifically, the Examiner indicates that at line 12, the phrase "separating the first and second light matrices" should be changed to "combining the first and second light matrices". Applicants have amended claim 8 to replace the phrase "separating the first and second light matrices" with the phrase "combining the first and second light matrices". In view of this amendment to claim 8, the basis for the Examiners' objection thereto has been removed. Therefore, it is respectfully requested that this objection be withdrawn.
